

# By Signing the Petition below, I call on Starbucks to:

- To start brewing and promoting Fair Trade coffee in all of their cafes and provide clear evidence that they are in compliance with their previous promise to improve the wages, working conditions, and lives of the people who grow, harvest, and process the coffee they buy in Guatemala and other nations.
- Remove Monsanto's dangerous rBGH (recombinant Bovine Growth Hormone) from their brand name products and all products sold in their cafes, on a global basis and place rBGH-free Labels on their ice cream and bottled drinks.
- Provide written assurance that they will stop using genetically engineered ingredients in their baked goods, chocolate and the soymilk they are using to make coffee drinks.
- Pledge that they will never use genetically engineered coffee beans.
